

# Palm Sunday Peg Donkey

## You will need:

- 2 wooden clothes pegs
- White card
- Green card
- Felt tips/paints
- Felt or wool for the donkey's mane and end of the tail
- Optional: googly eyes

## Instructions:

1. Draw an outline of the donkey's head and body on white card (or use the template provided). If you are creating your own, the body should be around 10cm long.
2. Cut out the outline and paint/colour the body and head grey on both sides. You may need to do one side and let that dry before doing the second side.
3. Paint/colour the pegs grey also to match the body. Colour the hooves black or brown if you can.
4. When the body is dry, paint or felt tip in the detail of the mouth, saddle, ears, etc. Now is also the time to glue on wool or felt for the mane and tail. It is also time to add googly eyes if you choose to use them.
5. Cut out a palm leaf shape from the green card (freehand or use the template provided). Write 'Hosanna' on the leaf.
6. Put your donkey together by gluing the leaf on to the donkey's back and nipping the pegs on to the bottom of the body where the legs should be.
7. Your donkey should now stand up on its own!

## Why Not Try?

- Making the head and tail separately and adding a split pin so that it can move.
- Making people with 'peg legs' in the same way to make a Palm Sunday scene.
- Using your models to make a stop-motion animation.
